REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest "pumping the crosslinkable fluid **after** a drilling, completion, or workover procedure" as called for in the claims. With respect to the Dawson reference, it is arguable that the reference does teach the use of the fluid during a drilling or completion procedure in col. 1, lines 20-29 as well as col. 4, lines 32-37. In particular, the reference states "well treatment fluids are commonly used in the drilling, completion, and treatment of subterranean formations" and the "well treatment fluid composition can be used in...temporary plugs for purposes of wellbore isolation and/or fluid loss control and other well completion operations." However, the reference fails to teach or suggest the method steps of forming the fluid composition followed by pumping the fluid in the formation **after** a drilling, completion, or workover procedure as called for in the claims. Therefore, the reference does not anticipate the invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
